A web developer with a background in information technology infrastructure. Passionate, self-driven, adaptable learner, and constantly striving to learn various programming technologies to build professional and modern websites.

PROGRAMMING LANGUAGES

- Html5, Css3, Sass, Material-UI
- Javascript, React, Restful APIs
- Node, Express, MongoDB

PROGRAMMING TOOLS

- Git, Npm, React Dev Tool
- Redux, Redux Dev Tool

EDUCATION

UNIVERSITY OF MINNESOTA - TWIN CITIES

B.S. Information Technology Infrastructure

Graduated in May, 2018

WORK EXPERIENCE

RETAIL TECH INC.

IT Service Desk Coordinator

May 2018 - Oct. 2019

- Professional and proficient use of Astea, a Field Service Program, to manage and facilitate service tickets submitted by retail store associates of partnering companies.
- Skillful use of Applix, an online analytical processing database server, to distribute service tickets between collaborating technicians and maintain an updated inventory database.
- Engage in dialogue with Service Delivery, Product, and IT management to discuss and manage the status of productivity, How to cultivate new improvements using known issues to implement new strategies and policies, and how to better support one another to achieve the highest level of service possible.

PROJECTS

WEB RESOURCES

Sharing tutorials and courses

- https://webresources.herokuapp.com/
- Integrates restful API's with Node, Express, Mongodb, and Mongoose
- Uses React to interact with API's and allows authenticated users to create, read, update, and delete resources
- Redux for handling all global state management

ENTRY LEVEL

Job aggregation

- https://entrylevel.io/
- Job aggregator for entry-level positions targeting interns, students, graduates, career changers, etc.
- Extension to established career websites that benefits users through optimizing the front end experience through features such as fixing bugs, implement sorting, and query string features

DISNEY SOLO

Movie information

- https://disneysolo.netlify.com/
- React program communicates with movie database's public API and displays all relevant information such as now playing, most popular, top rated movies, etc.
- Uses Reselect Library to handle caching data to reduce network requests to public API's

WEB DEVELOPER PORTFOLIO

Personal portfolio website

- https://www.vuthysuon.com/
- Website is built using Create React App and customized Material UI framework. Designed and built by Vuthy Suon.
- Optimized web performance using Google Lighthouse auditing tool to achieve 100% on performance, accessibility, best practices, and S.E.O.
